International Air & Space Training Institute™

IASTI® ENGINEERING PATHWAY

THE ACCOUNTABLE PERSON FOR AIRCRAFT MAINTENANCE

THE NEXT GENERATION

An Engineer is a skilled professional with a balance of knowledge, skills and behaviours to ensure the aircraft is safe and fit to fly. The engineering pathway is a new education and training route for those who aspire a career as an aircraft engineer. The pathway has been created with industry for the industry. The IASTI® Engineer Pathway prepares learners for their future as an engineer, combining an accredited qualification with a deeper industry knowledge base, practical experience, industry specific non-technical skills including confidence building and leadership management, as well as industry led theoretical knowledge topics required for an engineer.

WHAT WILL I GAIN?

- Academic Achievement
- Complete Wellbeing
- Personal Direction
- Leadership
- Collaborative Mindset
- Effective Communication
- Digital Fluency
- Social and Cultural Values
- Aviation Values
- Critical Thinking
